## Waterworks

Custodian: The Corporation of the District of Saanich, Underground Services Division
Publish Date: January 1, 2003
Abstract: The waterworks dataset represents a collection of features that convey water through the distribution system.

Purpose: The waterworks dataset is captured to support the management, planning, and maintenance of waterworks assets.

Status: Complete
Update Frequency: Weekly
Credits: The Corporation of the District of Saanich, Engineering Department, Public Works Division, Storm and Wastewater Section, Corporate GIS.

Coordinate System: NAD 1983 CSRS UTM Zone 10N (WKID: 3157)
Geometry Type: Point, Line \& Polygon
The 13 Data Layers comprising the Waterworks dataset are:

1. Water Abandoned Line
2. Water Abandoned Point
3. Water Control Valve
4. Water Fitting
5. Water Hydrant
6. Water Meter
7. Water Pressurized Main
8. Water PRV Assembly
9. Water Pump Station
10. Water Reservoir
11. Water Service Line
12. Water Structure
13. Water System Valve

## 1. Water Abandoned Line

Abstract: An abandoned water line is a decommissioned water pipe that no longer participates in the waterworks network. The abandoned line remains in the ground with the disconnected ends being capped. Types captured include: Pressure Main (Distribution, Transmission) and Service (Standard, Hydrant, Fire)

Geometry Type: Line
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 12 |
| LINETYPE | Type of line | Pressure Main (Distribution), Service <br> Line (Standard) |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich |
| FACILITYID | Unique Alphanumeric ID assigned <br> by Saanich | WPM007718 |
| MATERIAL | Pipe material type | Ductile Iron |
| DIAMETER | Diameter of pipe in millimetres | 200 |
| SHAPE | Feature geometry | Line |
| SHAPE.LEN | Length of pipe in metres | 382 |

## 2. Water Abandoned Point

Abstract: The abandoned water point is a decommissioned device that formerly transported, stored or analyzed water through the waterworks network. Abandoned points are comprised of an extensive classification of former junction points including: Bulk Meter, Hydrant, Manhole, Meter, Pump Station, Reservoir, Control Valve (Pressure Regulating), Fitting (Cap, Coupling, Reducer), System Valve (Air, Branch, Check, Flush, Hydrant, Mainline, Service, Zone).

Geometry Type: Point
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 12 |
| POINTTYPE | Type of device | Fitting (Cap), System Valve (Mainline) |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich |
| FACILITYID | Unique Alphanumeric ID assigned <br> by Saanich | WSV008788 |
| SHAPE | Feature geometry | Point |

3. Water Control Valve

Abstract: A water control valve is a device that controls the flow of water by means of reducing, relieving or sustainment. There is one type captured: Pressure Regulating Valve.

Geometry Type: Point
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 146 |
| SUBTYPE | Type of control valve | Pressure Reducing Valve |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> respozsible for maintenance of <br> feature | District of Saanich |
| FACILITYID | Unique Alphanumeric ID assigned <br> by Saanich | WCV000061 |
| SHAPE | Feature geometry | Point |

## 4. Water Fitting

Abstract: A water fitting represents a device used to connect or cap water main lines. A fitting can indicate a transitional change in pipe material, diameter, or installation year. There are three types captured: Cap, Coupling, and Reducer.

Geometry Type: Point
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 146 |
| SUBTYPE | Type of fitting | Cap, Coupling, Reducer |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich |
| FACILITYID | Unique Alphanumeric ID assigned <br> by Saanich | WFG001734 |
| SHAPE | Feature geometry | Point |

5. Water Hydrant

Abstract: A water hydrant represents the outlet used by fire fighters to attach fire hoses to the waterworks network. Secondary uses include flushing main and service lines, filling tank trucks, and providing a temporary water source for construction projects.

Geometry Type: Point
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 12 |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich |
| HYDRANTNUMBER | Unique number designated and <br> physically labeled on hydrant | 1401 |
| LOCATION | Civic address close to hydrant | 3498 LOVAT AVE |
| SHAPE | Feature geometry | Point |

## 6. Water Meter

Abstract: A water meter is a device used to measure the volume of water usage at a particular property within the District of Saanich. It is commonly located at the end of a service line.

Geometry Type: Point
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 292 |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich |
| REGISTERSERIAL | Register Serial Number | 042764934 |
| STREETUNIT | Street Unit Suffix | A, B, C |
| STREETNUMBER | Numeric value assigned to the <br> property or building | 1250 |
| STREETNAME | Name of the street | HASTINGS ST |
| PRESSUREZONE | Pressure zone number | 1 |
| SIZEMM | Pipe size in millimetres | $12.5,50,75$ |
| SHAPE | Feature geometry | Point |

## 7. Water Pressurized Main

Abstract: A pressurized water main is a pipe used to distribute water through the waterworks network. There are two types captured: Distribution (less than 600 mm diameter) and Transmission (greater than or equal to 600 mm diameter)

Geometry Type: Line
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 12 |
| SUBTYPE | Type of main | Distribution, Transmission |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich |
| FACILITYID | Unique Alphanumeric ID assigned <br> by Saanich | WPM006329 |
| DIAMETER | Pipe diameter in millimetres | 150 |
| MATERIAL | Pipe material type | Ductile Iron |
| RELINED | Pipe has been relined | Yes or No |
| RELINEMETHOD | Construction method used for pipe <br> relining | Pipe Bursting, Spray in Place <br> Coating |
| RELINESTRUCTURAL | Relined pipe has had significant <br> reconstruction | Yes or No |
| LINERTHICKNESS | Thickness of liner in millimetres | 10 |
| HOSTMATERIAL | Material type for host pipe | Cast Iron |
| SHAPE | Feature geometry | Line |
| SHAPE.LEN | Length of pipe in metres | 272 |

## 8. Water PRV Assembly

Abstract: A PRV water assembly is a manmade structure or chamber that houses pressure regulating valves and other mechanical equipment. PRV assemblies are typically located underground and are represented by a polygon outline of the structure's foundation.

Geometry Type: Polygon
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 12 |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich |
| FACILITYID | Unique Alphanumeric ID assigned <br> by Saanich | WPV000034 |
| NAME | Name of PRV assembly | PHYLISS PRV |
| SHAPE | Feature geometry | Polygon |
| SHAPE.AREA | Area in square metres | 11.76 |
| SHAPE.LEN | Length of pipe lateral in metres | 14.38 |

## 9. Water Pump Station

Abstract: A water pump station is a structure that houses pumps and other equipment for pumping water from one location to another. The pump station connects incoming and outgoing pipes and is represented by a point that is placed within the outline of the structure's foundation.

Geometry Type: Point
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 12 |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich |
| FACILITYID | Unique Alphanumeric ID assigned <br> by Saanich | WPS000016 |
| LOCATIONDESCRIPTION | Location description of feature | QUAYLE RD @ INTERURBAN RD |
| NAME | Pump station name | QUAYLE PUMP STATION |
| SHAPE | Feature geometry | Point |

## 10. Water Reservoir

Abstract: A water reservoir is a storage structure that supplies water to the network and connects incoming and outgoing pipes. The reservoir is represented by a point that is placed within the outline of the structure's foundation.

Geometry Type: Point
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 12 |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich |
| FACILITYID | Unique Alphanumeric ID assigned <br> by Saanich | WRV000006 |
| LOCATIONDESCRIPTION | Location description of feature | WESLEY RESERVOIR |
| NAME | Reservoir name | Point |
| SHAPE | Feature geometry |  |

## 11. Water Service Line

Abstract: A water service line is a small-diameter pressurized pipe that typically runs from the pressurized main to one of the following devices: customer meter, hydrant, valve, or structure. There are three types captured: Standard, Hydrant, and Fire.

Geometry Type: Line
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 12 |
| SUBTYPE | Type of service line | Standard Lateral, Hydrant Lateral, <br> Fire Lateral |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich |
| FACILITYID | Unique Alphanumeric ID assigned <br> by Saanich | WLL014355 |
| DIAMETER | Pipe diameter in millimetres | $12.5,37$ |
| MATERIAL | Pipe material type | High Density Polyethylene |
| SHAPE | Feature geometry | Line |
| SHAPE.LEN | Length of pipe lateral in metres | 13.8 |

## 12. Water Structure

Abstract: The water structure is a manmade structure or building that is used to house equipment, convey, or store water. A water structure is typically located partially underground and is represented by a polygon outline of its foundation. The types captured include: Chamber, Manhole, Other, Pressure Meter Station, Pump Station, Reservoir, Valve Chamber.

Geometry Type: Polygon
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 4 |
| STRUCTURETYPE | Type of structure | Chamber, Manhole, Other, Pressure <br> Meter Station, Pump Station, <br> Reservoir, Valve Chamber |
| FACILITYID | Unique Alphanumeric ID assigned <br> by Saanich | WSE000117 |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> respossible for maintenance of <br> feature | District of Saanich |
| SHAPE | Feature geometry | Polygon |
| SHAPE.AREA | Area in square metres | 11.13 |
| SHAPE.LEN | Perimeter in metres | 13.39 |

## 13. Water System Valve

Abstract: A water system valve is a device that is fitted to a pressure main or service line and used to control the flow of water within the waterworks network. There are eight types captured: Service, Air, Mainline, Branch, Flush, Hydrant, Check, and Zone Boundary.

Geometry Type: Point
Attribution Information:

| FIELD NAME | DESCRIPTION | EXAMPLES |
| :--- | :--- | :--- |
| OBJECTID/FID | Internal feature number | 12 |
| SUBTYPE | Type of valve | Service, Air, Mainline, Branch, Flush, <br> Hydrant, Check, Zone Boundary |
| ADMINISTRATIVEAREA | Organization or jurisdictional owner <br> responsible for maintenance of <br> feature | District of Saanich <br> FACILITYIDUnique Alphanumeric ID assigned <br> by Saanich |
| WSV000893 |  |  |
| DIAMETER | Opening size of valve in millimetres | 25 |
| SHAPE | Feature geometry | Point |
